

Takes reins Aug. 1

Holland chosen as Y president

By VAL HALE
Universe Staff Writer

Dr. Jeffrey R. Holland was chosen last Friday by Church officials to succeed Dallin H. Oaks as the ninth president of BYU.

President Spencer W. Kimball, chairman of the University's Board of Trustees, made the appointment only 48 hours after Oaks made public his release as head of BYU. Holland, who has been serving as the Church Commissioner of Education, will assume the president's role Aug. 1, 1980.

The announcement came as a surprise to Holland, who had been serving as a liaison between the search committee and the Commissioner's Office in charge of compiling resumes and file folders of men and women he thought would be considered for the office.

"I did not know they (the search committee) were discussing me," Holland said. "I had supposed that

because my name had not come up any time in my hearing that I was not being considered. So it was a surprise to me."

Holland refuted earlier claims that he had been chairman of the search committee which had been appointed to choose the next president. The committee was headed by Elder Gordon B. Hinckley and included several other General Authorities.

Holland, 39, who has been Oaks' supervisor over the past four years, has high praise for Oaks' handling of the university's affairs. He admitted, however, that "change is inevitable." "I've worked very closely with President Oaks in terms of the programs he's pursued," Holland said. "I think I'll probably wait and listen and talk to the faculty and learn as much as I can and then we'll continue to pursue many of the same things that President Oaks has pursued. I think some things of our own will emerge as we go down the road administratively."

Many people expected to see the next president have a legal background in order to handle the unique problems BYU has faced with regards to government regulations and intervention. In spite of his lack of legal experience, Holland said he will continue in Oaks' tradition of fighting for the First Amendment rights of the church-owned university.

"I think we'll continue to try to make the best possible case and,

maybe, the most public voice we can for the rights and the contribution and the place of not only private education per se but, in this case, church-related private education," he said.

The same legal staff that successfully aided President Oaks in court battles with Title IX and, more recently, the Internal Revenue Service, is available for Holland's use in future legal conflicts.

Financing a university with an enrollment of more than 26,000 students is another challenge that will face the new president. BYU receives most of its financial aid from the LDS Church but, as the demand on Church funds has grown, more emphasis has been placed on fund-raising programs at the university. Holland said he will continue to pursue efforts to raise money from sources other than the Church but declined to say whether or not the university would be able to become financially independent from the church.

Having been Commissioner of Education, Holland was technically Oaks' boss but he did not consider the new position a drop in rank.

"I'm flattered that the leaders of the Church would place that kind of confidence in me," he said. "Dallin Oaks has never had a better friend or more devoted admirer and to be asked to succeed him is an honor and a humbling thing."

Holland has become well acquainted with BYU over the past years, having received both his bachelor's and master's degrees from the university. He was serving as dean of religious instruction at BYU before his appointment as commissioner of education.

Since the appointment was made by General Authorities, and because the university is run by the LDS Church, Holland said his new position will not only be a professional—it will also be a church calling.

"This obviously has to be considered a professional career opportunity," Holland said. "I'm hired and I'm fired and I'm paid, so it has to be seen as a professional assignment."

But, by the very nature of the Church for which I work and the education system under whose direction I work, I think it would be foolish and inappropriate to suggest that that does not have some special sensitivity and special responsibility for religious-related, church-related, Latter-day Saint-related assignments," he said.

Oaks was released last Wednesday at his own request after church officials accepted his recommendation that the university's president be replaced every one or ten years. He will pursue scholarly research and writing in the fields of church-state relationships and related matters. He will also continue teaching in the J. Reuben Clark Law School.

Mrs. Jeffrey R. Holland smiles as Holland's appointment as BYU president was being announced to the public at a press conference Friday.

Holland brings wide experience appointment as Y president

KEVIN MANSFIELD

Universe Staff Writer

The appointment of Jeffrey R. Holland as president, BYU gains an administrator with extensive university, church and national experience.

During this presidency will face those kinds of challenges; pioneering, as well as joyful moments that will give us cause to be proud and appreciative and humbled. I felt much the same way in being asked to succeed Oaks at the time there was a lot of speculation in the commissioner's office, we had a lot of opportunity to

id, a St. George native, did his graduate studies at Dixie and where he received his bachelors in English in 1965 with highest honors. He received a masters

degree with distinction from BYU and was designated an E.S. Hinkley Scholar.

Holland received his doctorate in the field of American Studies from Yale University in 1973 and was elected a Yale University Fellow.

Holland currently serves as commissioner of the LDS Church Educational System, which affects more than 750,000 students and includes the church's colleges, universities, seminaries and institutes of religion.

The world-wide system encompasses some 60 countries and involves classes taught in nearly 20 languages.

His emphasis on academic excellence is apparent in a recent speech to an Inter-Housing Council banquet.

"The issue is not the amount of talents but the effort," Holland said.

"We do not take enough time to think, to ponder, to desire and to believe. There is a way of thinking, an attitude, that doesn't go with running from class."

Prior to his appointment as commissioner of education, Holland served as Dean of Religious Instruction at BYU. Ellis T. Rasmussen, the man who took over as dean when Holland left, expressed his approval of Holland's appointment as BYU's new president.

"We were all delighted. We've always had a close relationship with him when he was dean," Rasmussen said. "Now to have him back in the president's post is pleasing to us."

"I am totally confident in his capacity for the job and look forward to a renewed association."

More cars, bodies discovered under wrecked bridge in Florida

PETERSBURG, Fla. (AP) — Crews on Monday found three more cars, including two that had tipped inside, in the tons of wreckage from the Sunshine Skyway bridge collapse.

Her bodies floated up on a barge and one was found on the surface of Tampa Bay, the total known dead to 30. Eight sunken vehicles have been pulled from the bridge Friday morning, down a towering 1,400-foot

rough County Sheriff's office said they still had no idea how many times remained trapped in the

twisted metal and chunks of concrete on the bottom of the bay.

"Two of the cars we found today we hadn't seen before but we suspected they were down there," said Sheriff's Maj. Cal Henderson. "We don't know yet how many vehicles are still down there."

Authorities now have raised or sighted a Greyhound bus which carried 25 persons, six cars and a pickup truck. One of the cars, an El Camino, was tagged with a buoy by divers Saturday but they have been unable to locate it since.

Two of the bodies found Monday were in automobiles hoisted onto a barge. One car was so badly mangled

workmen had to cut the top off to free the body inside. The third car, a Volkswagen, was brought up empty.

Two bodies, both young women, washed up along a public beach more than a mile from the bridge. The body of another victim, a man in his late 50s, was found floating near a buoy in the channel. None was immediately identified.

Meanwhile, a three-member Coast Guard Marine Board of Inquiry scheduled hearings for Tuesday with the National Transportation Safety Board to investigate the accident.

A section of the bridge as high as a 15-story building dropped into the bay when the Summit Venture, a 608-foot freighter, hit a piling during a squall.

The Liberian-registered freighter, her bow still draped with bent steel girders from the bridge, sat anchored offshore near Mullet Key. The freighter has a 35-member Chinese crew under the command of H.C. Liu of Hong Kong.

Temporary blackout puts Elder Benson in hospital

President Ezra Taft Benson was admitted to the LDS Hospital Monday at 2:45 p.m.

According to Church spokesman Jerry Cahill, Benson was working at his desk at home when he experienced a temporary blackout and momentary blindness. He lay down on his sofa to rest. As a precaution, his wife called his doctor, Dr. Ernest L. Wilkinson. Paramedics were sent to his house and they took him to the hospital where he was given a reassuring neurological examination by the admitting physician, Dr. Charles Rich.

"Drs. Rich and Wilkinson decided to admit President Benson for observation. He is in good condition," said Cahill.

"He's in good spirits," said spokesman Don LeFevre. "His wondering why everybody's making such a fuss over him."

The incident happened approximately at 2 p.m. "I will be in overnight for observation and after that it is uncertain," said Rich.

President Benson has been a member of the Council of the Twelve for more than 35 years. He was ordained an apostle Oct. 7, 1943, at the age of

44. He was sustained as president of the Council Dec. 30, 1973.

President Benson was born Aug. 4, 1899 in Whitney, Idaho. He earned a master's degree from Iowa State College, later undertaking graduate study at the University of California. He helped organize the Idaho Cooperative Council and was its first secretary.

He served as executive secretary of the National Council of Farmers Cooperatives and, during World War II, served on a four-man agricultural advisory committee to U.S. President Franklin D. Roosevelt.

In 1952, he was appointed to the cabinet of President Dwight D. Eisenhower as Secretary of Agriculture; he returned to full-time church work in 1961.

Before becoming an apostle, President Benson served as a state president on two occasions and as a missionary in the British Isles. He was president of the European Mission immediately following World War II and in 1963 was again called to preside over that mission from headquarters in Frankfurt, Germany.

He and his wife, Flora Smith Amussen Benson, have six children.

before turning the matter back to Khomeini.

On Saturday, the Tehran newspaper Banded said Bani-Sadr would appoint a prime minister and Cabinet within a week and that the new government's first duty would be to try to resolve the United States-Iran crisis.

But another newspaper, Ettelaat, quoted Sadeq Tabatabai, a top official in the prime minister's office, as saying that because of "recent developments, I don't think Mr. Bani-Sadr will appoint a prime minister before the commencement of Parliament."

He did not elaborate on the "developments," but when the council took up the question Sunday, Bani-Sadr was apparently blocked once again.

Many IRP members have advocated spy trials for the Americans unless the deposed Shah of Iran is returned to Iran to face trial.

Bani-Sadr is said to favor a quick end to the hostage stand-off so Iran can devote more attention to its internal problems.

But candidates he supported finished far behind the IRP in the parliamentary balloting, and the Iranian president, elected overwhelmingly last January, appears to be facing a harder time than ever taking full control of his country.

Observers saw the clergy-dominated Revolutionary Council's failure to name a prime minister during the weekend as yet another setback for Bani-Sadr.

The council was reported to have debated the appointment of a prime minister for several hours Sunday

The prime minister's office has been vacant since Mehdi Bazarani resigned after the seizure of the U.S. Embassy and American hostages 192 days ago.

Observers believe Bani-Sadr's appointment of his own man as prime minister would strengthen his political position, particularly if the choice had Khomeini's backing.

The Parliament was originally to have been composed of 270 members.

But run-off elections in 23 districts were postponed because of unsettled conditions or charges of irregularities in the first round of voting March 14.

It is not clear when those seats will be filled. But the constitution provides that the legislature can convene as soon as two-thirds of the 270 seats are filled.

Universe photo by Paul Erickson

A BYU coed breaks out an umbrella to shield herself from rainy weather. Weather Service officials say unsettled weather may continue throughout the week.

Forecast calls for unstable weather

A low storm front off the California coast should result in continued unstable weather conditions in this area during the remainder of the week.

The National Weather Service in Salt Lake is predicting partly cloudy skies and a 20 percent probability of measurable rain for Tuesday. Temperatures should reach the low 60s during the day, and 30 to 40 at night. Light winds are also expected.

For the remainder of the week the Weather Service predicts cloudy skies in the mornings with partial clearing in the afternoons. Temperatures should reach the

mid-60s by Wednesday, and as high as 72 by Saturday.

Recent rainstorms in the Salt Lake, Ogden and Provo areas have not had an immediate effect on flood conditions in the Springville-Hobble Creek area.

Walt Draper, Utah County Flood Control director says, "There has not been enough precipitation to cause a significant rise in water run-off levels. In fact, colder temperatures have reduced the immediate run-off problem."

However, according to Draper, severe warming trends could cause the new snow in the mountains to melt very quickly and this could result in flooding.

Universe looks at MX and Utah

About the size of Pennsylvania, the proposed MX site will have an irreversible impact on the Utah-Nevada Great Basin area. Many have called it the biggest public works project in U.S. history. To build MX will require the laying of 10,000 miles of new road and double the number of people now living in the MX area.

The Department of Defense says MX is necessary to keep ahead of the Soviet Union in arms development. Critics say it is unnecessary or that there are better methods of arms deployment. For the full story see page 6.

News Spotlight

Compiled from The Associated Press

Theater owner wants R movies

SPANISH FORK, Utah — Theater owner Kelly Carr says he can't get by when only 15 people come to see family oriented films on Friday nights, so he wants to begin showing R-rated films.

"It's a matter of making a living or not," said Carr, who purchased the Angels Theater about a year ago. Carr said he wants to show "The Rose," starring Bette Midler, beginning Thursday.

But the city attorney and citizens groups are lining up to oppose the plans. City Attorney Richard Taylor wrote Carr a letter.

"I think I'm accurate when I say that a vast majority of our citizens would prefer that R-rated movies do not surface here. I will not tell you the reason. I think you already know them," the letter said.

Mayor Brent D. Hansen said Carr has been cooperative and has tried to make enough money by showing G-and PG-rated films, but has not had enough attendance.

Carr said his average attendance on Friday nights has been 15, and that only two children watched a Saturday matinee recently.

Hansen suggested community and church leaders make an effort to support the films Carr has been showing. He said such an endeavor worked several years ago.

Muskie to call for firm sanctions

WASHINGTON — Secretary of State Edmund S. Muskie's first overseas assignment, beginning Tuesday, is to urge West European allies to stand firm on sanctions against Iran.

Some of the Europeans are considering exemptions to the decision taken by the Common Market last month to cut off all exports to Iran except food and medicine by next Saturday.

State Department spokesman Thomas Restack acknowledged Monday that "some problems remain to be worked out" by the allies on the sanctions question.

But he said the United States still expects them to adopt the package of sanctions they tentatively approved last month.

Anderson bids for Utah ballot

SALT LAKE CITY — Rep. John B. Anderson, R-Ill., appears certain to be on the Utah ballot as an independent candidate for president, Doug Foxley, deputy secretary of state, said Monday.

Supporters filed petitions bearing 693 signatures last Friday, and filed more petitions Monday, bringing the total to about 2,000, Foxley said.

Three hundred signatures of registered voters were needed by the end of business Monday.

Foxley said the signatures had not yet been certified, but it seemed certain enough would be declared valid for Anderson to be on the ballot.

When Anderson first announced he would run as an independent, there was a question whether he could be on the Utah ballot.

State law prohibits a candidate running as an independent after attempting to get on the ballot as a party candidate.

But Foxley said the law had been interpreted as not applying to Anderson's attempt to win the Republican presidential nomination, because he had not filed in Utah as a Republican candidate.

Jury to be selected for LeBaron

SALT LAKE CITY — Jury selection has begun for the trial of polygamist cult leader Ervil LeBaron, charged with murder, attempted murder and conspiracy in a bizarre 1977 plot to eliminate rivals.

LeBaron is accused of masterminding the May 10, 1977, slaying of Dr. Ruon Allred, a 71-year-old polygamist leader who was gunned down in his Murray, Utah, naturopathy office.

He is also charged with planning the murder of his own brother, Verlan LeBaron, also a rival cult leader.

LeBaron, 55, is head of the polygamist sect called the Church of the Lamb of God.

Prosecutors contend he masterminded Allred's killing and planned others in an effort to wipe out rival sects.

Allred was shot six times in his office by two persons dressed as women.

Wright to challenge Matheson

SALT LAKE CITY — Claiming broad party backing, former state Republican chairman W. R. Wright has announced his candidacy for challenging Democratic Gov. Scott M. Matheson.

Wright announced his candidacy at a news conference, saying he would focus on differences between him and Matheson. At the same time, he announced across-the-board party support for his candidacy, saying Sens. Jake Garn and Orrin Hatch convinced him to run.

A news release described Wright as the party's "consensus" candidate, despite the fact Rep. Ted Davis, R-Provo, announced his candidacy more than a year ago.

Davis could not be reached for comment.

David Hansen, party executive director, acknowledged Davis was still a candidate but said Wright has "the party's support."

Wright has to get 70 percent of the convention vote to avoid a primary runoff.

Marines disperse demonstrators

SAN SALVADOR, El Salvador — Right-wing demonstrators blocking U.S. Ambassador Robert White from leaving his official residence were dispersed Monday by U.S. Marines. More than three tear gas grenades at the crowd, an embassy spokesman reported. He said there were no injuries.

Richardson tries again for Congress

BYU faculty member Jed Richardson filed Monday for a second try at the U.S. congressional seat held by Gunn McKay.

Richardson ran against McKay two years ago and came within 1 1/2 percentage points of upsetting the incumbent congressman. He has been gaining support since that race.

The candidate said in an interview that federal bureaucracy is one of the biggest problems the Congress needs to deal with. He accused

bureaucrats of exercising power that does not rightfully belong to them.

"Expansion of authority and power has created a fourth branch of government in which they create their own rules," he said. "Private enterprise has built great nations and saved great nations; we have to turn to private enterprise to return to greatness."

Richardson said he feels he is a constitutionalist. He quoted Lincoln who said, "The Federal government

should do for the states and people what the states and people cannot do for themselves."

"MX helps Russia locate our missiles. We should go the other way and put our missiles where we please," Richardson said.

Born and raised on a farm in Brigham City, Richardson is currently a professor of communications and a debate coach at BYU. Under his guidance, BYU's debate teams in the past 25 years have consistently

captured national honors.

His LDS Church positions include serving as bishop for four years and current service on a high council.

Richardson said in the 1978 election, he received the support of more than 70 percent of the

delegates at the State Republican convention to eliminate three other Republican hopefuls.

Because of his communications background, Richardson feels he can influence government to work for the people.

Chipman case appealed; insufficient evidence cited

An attorney for David Chipman filed an appeal May 5 in Superior Court in Wasatch County after his client was given probation April 11 for 24 months for attempting to commit forcible sexual abuse, a misdemeanor, and was fined \$450 in Fourth District Court in Provo.

Chipman, 24, who is not a BYU student, was arrested by BYU Security/Police last February and was charged with making homosexual advances toward David Neumann, an undercover police agent.

In the April trial, Judge David Sam, of the Fourth District Court, said that there was insufficient evidence to prove that Chipman had committed the crime, but that there was enough evidence to indicate that he attempted to carry it out.

Ronald Stanger, Chipman's attorney, says the appeal is being filed on several major points.

Stanger says officers were not, in fact, policemen at that time, and that they were acting out of the bounds of their authority in making the arrest.

Stanger also said since there were no facts or evidence to substantiate the charge that the crime had been committed, there cannot be evidence to indicate Chipman attempted to carry out the crime.

"If there was not enough evidence of one charge, there cannot be evidence of the other charge," he said.

Stanger claims in the appeal, that BYU Security/Police used entrapment procedures in the arrest.

Orem approves mall expansion

The Orem City Planning Commission approved a more than \$5 million expansion of the University Mall at the commission's bi-monthly meeting Thursday.

The Phase II expansion project will increase the total Mall area by about 18,000 square feet and add about 50 new stores, according to spokesmen for Woodbury Corporation retail developers. Construction of the 14-acre expansion will begin this June and is scheduled for completion by July, 1981.

Lynn Woodbury, partner in the corporation, believes the expansion will make the mall one of the largest, if not

the largest, in the state.

The expansion will include small-store space of approximately 95,000 square feet. In addition, a California-based department store, Neer's, will occupy a two-level store area of about 91,000 square feet.

The addition will extend 660 feet northward from the mall area in front of J.C. Penney's.

"Not only will the new stores help accommodate the additional retail demand resulting from the growth of the Utah Valley area, but they'll also provide 1,000-1,500 new jobs," said Rick Woodbury, Lynn's brother.

Final approval of the planned expansion will be discussed in the Orem City Council meeting Tuesday night.

Passey named Chief Justice

By NANCY HENDERSON
Universe Staff Writer

Five ASBYU Supreme Court judges and two ASBYU Commons Court judges were temporarily ratified during the ASBYU Executive Council meeting Thursday afternoon.

The Supreme Court

judges appointed were Lee Passey, temporary Chief Justice, and Joe Heworth, George Naegle, James Ware, Van Leishout and Mark Francis as temporary Supreme Court judges for spring and summer terms.

The Commons Court judges, whose appointments last for two weeks, are Bill Hoke, Senior Judge, and Dan Portwood. According to by-laws, the Commons Court judges will be permanently ratified in two weeks after sufficient review by the Council.

A small debate started during the meeting when

Passey expressed doubts about appointing Naegle as a Supreme Court judge.

Naegle had been negative about the judicial system as a whole and hasn't shown respect for the Supreme Court, Passey said.

Naegle attributed his negative attitude to trying to make positive changes in "a system that would not change."

Passey stated Naegle might not bring the unbiased point of view that's necessary in the judicial system.

"Mr. Passey has his biases, I have mine," Naegle said. "No one is unbiased."

Both Passey and Naegle agreed their differences of opinion would not hurt the court but in fact help.

"You have to have controversy in a court system. That's the only way you're going to hear all the viewpoints," Passey said.

ASBYU President Jeff Duke said he knew about the contention between Passey and Naegle when he recommended them for the judiciary.

"I was surprised they would be so open about it," Duke said. He asked Naegle specifically to be recommended as a Supreme Court judge because "you can't have

everyone be of the same opinion in a court system." Duke agreed with Passey on the need for controversy in a judiciary.

Casey Haws, ASBYU Attorney General, Kevin Mansfield, ASBYU Director of Public Relations, and Bud Scruggs, Ombudsman, were also notified by the Council.

Kevin Frank, ASBYU Executive Vice President, Scruggs and Mansfield were sworn into their offices by Chief Justice Passey.

Holland

continued from page 1

Dr. Martin B. Hickman, who served with Holland when Holland was dean of the College of Religion, also expressed high regard for the new president.

"I think he'll give good academic and scholarly leadership to the university," Hickman said. "He is a good administrator — there's ample evidence of this."

"He has a splendid sense of humor. He doesn't take himself too seriously," Hickman added.

Holland's professional association with the church educational system spans more than 15 years. He has served as an instructor or director at LDS Institutes of Religion in Hayward, Calif., Seattle, Wash., New Haven, Conn., and Salt Lake City.

A popular speaker and writer in the church, Dr. Holland has had more than 30 articles and addresses published in both LDS and professional journals, including "Vital Speeches of the Day."

Holland has had wide church experience, including service as a stake high counselor, a bishop's counselor, and a bishop, and counselor in three stake presidencies. He has also served as director of the Melchizedek Priesthood MIA program of the church and as chairman of the Young Adult Committee. He fulfilled a mission to Great Britain from 1980 to 1982.

Active in community affairs, Holland serves on the governing boards of the LDS Hospital in Salt Lake City and the Polynesian Cultural Center in Laie, Hawaii. He also serves on the Advisory Board of the National Multiple Sclerosis Head-and-Neck Committee and is the LDS representative to the National Congress on Church-Related Colleges and Universities. He was recently awarded Brigham Young University's Distinguished Alumni Service Award.

Holland is married to his high school sweetheart, the former Patricia Terry of St. George. They are the parents of three children.

Referring to her husband's appointment as BYU President, Mrs. Holland said, "We are very surprised. This morning I was making strawberry jam and this afternoon I'm the wife of a university president."

Drive-in gets drive-through window

CAHOKIA, Ill. (AP) — An elderly man recently drove through the wall of an ice cream shop, climbed out of his car and calmly ordered and consumed an ice cream cone and soft drink, authorities said.

"He said he wanted an ice cream cone and Coke and the people were apparently so taken aback that they served the guy," said police Lt. Guy Westbrook.

Several customers were present at the Dairy Queen when the car hit the counter inside the building Thursday. No one was injured, including the driver, a 67-year-old Cahokia resident.

"When we got there, the guy was eating the ice cream and drinking the Coke," Westbrook said.

The driver, who offered no explanation for what happened, finished the cone at the police station, where he was ticketed for driving without a license.

"There's nothing in the statutes for failure to yield to an ice cream store," Westbrook said.

Cougars own 14th straight title

By THOMAS BARLOW
Universe Sports Writer

The BYU baseball team will visit the Aloha State as a result of taking the WAC Northern Division championship with a pair of wins over Colorado State Friday afternoon.

The Cougars wasted no time in clinching their 14th consecutive crown, sweeping Friday's doubleheader, 6-3 and 19-9. This coming day will travel to Honolulu to face the University of Hawaii, Southern Division champions.

In the first game, the Cougars' bats were silenced over the first three innings by Colorado State starter Mark Huisman.

The Rams jumped out to a 1-0 lead and held the advantage until the Cougars got to Huisman for two runs in the fourth and fifth innings. As it turned out, this was all the Cougars needed.

The Cougars got strong pitching from Dave Beck in the opener, as he worked six impressive innings. Beck gave up just six hits and fanned five Rams. He improved his record to 9-2 with the win.

The Cougars received big hits from Mike Render,

Jeff Burton and Stan Younger to take the opener. Render ripped a solo home while Burton doubled and Younger tripled. Cliff Pastornicky contributed a crucial single and collected three RBIs in the game.

In the second game, the Cougars found themselves facing Ram hurler Mark Knudson, who had shut out BYU on April 12 in Provo. The Cougars chased him early and broke a 1-1 deadlock with five tallies in the third inning.

The big blow was a two-run homer by Cliff Pastornicky. "We owed Knudson one after shutting us out 11-0 in Provo," Coach Pullins said. In the fourth inning, Rick Thorne extended the BYU lead to 7-2 with a solo blast over the center field fence, his third homer of the year.

In the bottom of the fifth inning, BYU starter Leonard Peacock was relieved after being touched for three Ram hits, including a homer by rightfielder Higgins. Pullins went to the bullpen for ace reliever Scott Nebeker. Nebeker responded in brilliant fashion, retiring three Ram sluggers in just seven pitches.

The Cougars blew the game open with eight runs in

the seventh inning. The club batted around the order, getting big hits from Ken Clayton, Jeff Burton and Mark Adamiak. The Cougars collected six hits in the inning and extended their lead to 15-4. "The seventh inning opened the game up for us," Coach Pullins said.

Once again the Cougars finished the game in double figures for both runs and hits. They rocked Colorado State pitching for 20 hits in the 19-9 game and had three hits from four different players. Ken Clayton, Cliff Pastornicky and Mark Adamiak also collected three RBIs apiece in the nightcap.

Saturday, the Cougars and Rams got together to play one for pride. The Rams jumped to an 8-1 lead after three innings and held on to win 10-9. The win gave Colorado State a second place finish in the WAC northern division, with a WAC record of 11-5.

The Rainbows won the southern division by downing New Mexico, 11-10, Hawaii was down 10-0 at one point in that game. The Cougars will defend their WAC title in a best-of-three series Friday and Saturday.

Clampett and Y waltz to crown

The BYU Cougar golf team, bolstered by the torrid shooting of Bobby Clampett, cruised to an easy 31-stroke victory in the WAC golf championships in San Diego last weekend.

Clampett, the 1979 WAC medalist, repeated that performance with a final

round 69 in gusty winds to finish the three-day tournament 10 strokes under par at 206. Tom Costello and Barry Willardson of BYU tied Brandon Kop of Hawaii for second place honors at 218.

No golfer in the field, besides Clamp-

pet, managed to shoot below par for the entire tournament.

BYU was edged out of last year's WAC tournament by a surprising New Mexico team and the Cougars were not about to repeat the same finale. After struggling to a three-stroke lead on the opening day, the Cougars exploded for a second-round lead of 15 strokes and picked up 16 more while breezing to an easy victory on Friday.

Host San Diego State garnered second-place honors with a team total of 1,123 followed by New Mexico with 1,129 and Hawaii with 1,135.

BYU also got a strong performance

from Dick Zokol. He finished the tournament with a 225, which placed him in the top 10 finishers. Other BYU scorers were Dave DeSantis with a 226 and Keith Clearwater with a 232.

The victory marks the 10th WAC golf championship the Cougars have brought back to BYU. It is the first since 1978, when they lost it to Arizona State. The BYU golfers will now prepare for the national shoot-out to be held in Columbus, Ohio, in two weeks. The Cougars are currently ranked second in the nation and are among the pre-tournament favorites to win the national title.

Cougars fall short

SDSU stuns UTEP

By JERRY SPANGLER
Universe Sports Writer

Many of the fans in San Diego were not surprised, but the University of Texas-El Paso is still shaking its head in disbelief at the surprising Aztecs of San Diego State. The Aztecs stormed from third place in the last day of competition to win their first-ever WAC title in track and field.

The Cougars were second after the first two days of competition but had to settle for a third-place finish, well ahead of the rest of the field. SDSU tallied 180 points to 150 for UTEP and 131 for BYU.

The only bright spots for the Cougars after the first two days were a second and third place finish in the hammer event by Rolf Gustavsson and Goran Svensson, and third place finishes by Ed Eystestone in the 10,000 meter run and Larry Lawrence in the 3,000 meter steeplechase. Svensson also placed second in the discus with a toss of 187-11.

The last day of competition opened with the sprint events and with it a San Diego State explosion that propelled them well in front of UTEP. SDSU also had strong finishes in the field events.

BYU fell short the final day when they failed to place any sprint-

ters in the running events. Jari Keikas easily won the javelin and Anders Jonsson was first in the shot put with a 62-3 effort.

Agberto Guimaraes set a track record in the 800 meter run with a time of 1:43.83, shaving .02 seconds of the old record set earlier this year by USC runner David Omwansa. Coach Robinson praised Guimaraes as one of the best runners in the world at the current time.

BYU's Kim Neilson also won the high jump with a leap of 7-0, and Cougar pole vaulters managed third and fourth place showings. Record-breaking Rafael Echavarría was held to second place while he could mark a time of only 14.51 in the 110 meter high hurdles.

While San Diego State was putting an upset in the WAC, the BYU women almost pulled an upset of their own in Fort Collins. The women were leading the powerful UTEP Miners with only four events to go in the All-American VII track and field championships, but they couldn't hang on as the Texans made a last-minute surge and dashed BYU's titles hopes.

All-American Maria Bettoli won the high jump event by clearing the bar at 6-0 while teammate Rosalyn Rouse was winning the

javelin with a mark of 136-1.

Themis Zambrzycki withstood the freezing rains to win the pentathlon title with a 3,884 total in the five events. Linda Bourn, while running her fourth race of the day, claimed an individual win in the 100 meter hurdle.

In the team events, the Cougar women shattered the BYU record of 1:55.4 by more than 12 seconds in the sprint medley relay and also won the 400 meter relay with a time of 47.2. Both relays were anchored by Thais Zambrzycki, who has been trying for a position on the Brazilian national team and has been setting personal records while doing so.

U of U nudges Cougars out of net championship

By NANCY HARRIS
Universe Sports Writer

Favoring University of Utah squeezed past BYU, 5-4, Saturday to claim the WAC Tennis Championships in San Diego.

The Cougar men entered the championship round of play without losing a match, scoring victories over UNM and Hawaii, 9-0.

BYU and Utah tied for the conference crown last year, with BYU getting the nod to continue to the NCAA championships.

Coach Larry Hall, head first-year tennis coach at BYU, was pleased with the team's performance throughout the tournament.

"It was a good tournament for us," said Hall. "We were able to win our previous matches handily. The loss to Utah is nothing to be ashamed of. The guys played well. It was an outstanding match."

Rain delayed play near the completion of the singles matches Saturday afternoon.

The No. 6 singles match (Rich Bohne-BYU; Alan Barg-UTAH) was suspended in the third set with the score tied 5-5. "We'd lost a match point before rain stopped the match," Hall said.

Hall explained that the delay may have been a disadvantage to Bohne, who was unable to develop momentum throughout a match.

When they finally resumed play in late afternoon, Barg took the match into a tiebreaker and defeated the Cougar 5-1, with a 7-6, 2-6, 7-6 score for the match.

In other singles play, No. 2 Joel Miller and No. 4 Matt Murphy won in straight sets, and Rick Fought won in a three-setter at the No. 3 position.

Mike Tammen, No. 1 for the Cougars, lost his match in three sets to Jeff Robbins.

"Mike played much better Saturday," said Hall. "Robbins is one of the top 50 players in the U.S., so if Mike had won, it would have been an upset."

Victory in two out of three doubles matches gave the conference crown to top-seeded Utah.

Hall said the team "had a very good year; it's gone well."

Tammen and Fought will travel to Athens, Ga., next week for the national tournament. Tammen will play singles and team with Fought in doubles competition.

Hide in Plain Sight'

By JUDY POTTER
Universe Staff Writer
Caan makes his film directing debut in "Hide in Plain Sight," a movie that will touch your heart and make you live the struggle of a father in his missing children.
The directing complements his acting in this version of a true story set in Buffalo, New York. Tom Hacklin, (Caan) a divorced blue collar worker, is totally devoted to his two children, seriously disappear.
(Barbra Rae), Hacklin's ex-wife, remarries (Robert Vinmar), a "hood" who is in with the Mafia. The Mafia convinces Scolesse himself in for a robbery, and the Justice ent persuades him to inform on his s. In exchange for the information, Scolesse led a new life and new identity for him and y. Scolesse accepts, cooperates, and finally s with his wife and two stepchildren.
Caan goes to Scolesse's house to take his children visitation rights." Once there he finds the Ruthie and Scolesse gone. His search for entually leads him to a dead end — the department.
The release, "Hide in Plain Sight," appeals to the desire to expose the dealings of the government.
It is straightforward. The subject matter is truth and the film presents this information could be considered a dramatized documen-

'Redeemer' performed in Tabernacle

By CHARLES CRANNY
Universe Staff Writer

"The Redeemer, A Sacred Service of Music" was presented Sunday evening by the Mormon Tabernacle Choir with the Utah Symphony, as part of the ses-
quicentennial celebration of the LDS Church. Dr. Robert Cundick, a former BYU professor and current Tabernacle organist, wrote the music for this sacred service in 1977 and the text was chosen by Dr. Ralph Woodward, director of choral music at BYU. The work was first performed at BYU in 1978 by the A cappella and Oratorio Choirs, accompanied by the BYU Philharmonic Orchestra.

It is difficult to review this musical worship service, since each person experienced it differently, depending on preparation and mood. My purpose is to focus specifically on the musical elements, rather than the value of the worship service.

Prior to the actual performance of "The Redeemer," the congregation sang five hymns. Although the purpose of the singing was to prepare the people for the sacred service, it was a laborious "prelude." The prelude of "The Redeemer" is a beautiful tonal setting and needs to stand without the crutch of congregational singing.

The piece was originally written for two choirs, an orchestra and five or six soloists. Conductor, Gerold Ottley modified Sunday's performance to ex-
clude one choir and two or three soloists. This modification was detrimental to the entire piece.

At one moment, soprano soloist JoAnn Ottley, wife of the conductor, was singing the words of "Mary, the mother of Jesus." Soon after, Mrs. Ottley sang the words of a thundering angel. Something in the sanctity of Mary's words was lost by this transformation. These two inappropriately combined parts require two very different types of voices. Mrs. Ottley's high range had a beautiful tenderness on soft notes but her thundering notes were lacking.

Dr. Clayne Robison, artistic director of the BYU Music Theater, sang with his usual brilliance throughout the performance. On only one occasion, he should have sustained a final, high note longer. A different soloist with a higher range would have handled this particular number better. The rest of Robison's performance was flawless and he seemed to experience what he was singing. No doubt, he is one of the finest baritone in the area.

The part of Christ was sung by Robert Peterson, a widely acclaimed baritone, who has sung operas on Broadway. He has a beautiful sound in

Gerold Ottley conducts the Mormon Tabernacle Choir in Sunday's performance of "The Redeemer."

his lower register and performed well with the exception of scrambling on a couple of words and scratching the bottom of the pitch once or twice. Even though he sang well, at times he seemed to lack intensity and commitment.

The choir improved throughout the performance. At the beginning, the women had difficulty keeping their consonants together, unison of tone was lacking and there were a couple of stray high notes. The members were also glued to their music a little too much. By the end of the performance, however, the choir was performing very well and with great intensity.

The Utah Symphony seemed tired of the piece, having gone through three rehearsals. With the exception of an oboe that came in one measure early, the orchestra's performance was without error. The orchestral score is

not very challenging for professionals and, for this reason, another group, such as the Mormon Youth Symphony, could have done the work just as well and, perhaps, with more intensity. This would have saved the thousands of dollars spent on the Utah Symphony.

In general, the performance was done well. The audience disturbed the mood of the piece by leaving directly after the benediction, without listening to the postlude music.

During the premier performance of this piece at BYU in 1978, the audience remained in their seats and meditated for a number of minutes after the postlude. This desired effect was not achieved in the performance Sunday evening. Perhaps this is because the choir and orchestra did not "live" with this sacred service of music as did the BYU choirs and orchestra.

Wear a sandal that's as good as gold.
You've probably heard just how comfortable Scholl Exercise Sandals can be. That's because they're shaped like the bottom of your foot—with a hollow to cradle your heel and a little crest that fits in right under your toes.
But it's that little crest that gives you something more than comfort from Exercise Sandals. That crest makes your toes hang on when you walk so your legs firm up and shape up. To help give you legs that are the best they can be.
And now you can get a little something else special from Scholl. A miniature gold-finished Exercise Sandal that looks as great around your neck as the real ones do on your feet. It even comes on its own 18" gold-finished "S" chain.
This charm of a sandal, available only through Scholl, is yours for just \$4.95 including postage and handling. So step right up to the Scholl Exercise Sandal display, pick up an order blank (or send in the one on the right), and get the sandal that has the world on a chain.
Scholl Exercise Sandal Necklace Offer
Here's my check or money order payable to Scholl Necklaces Offer for the exclusive Scholl Exercise Sandal gold-finished charm and chain. I have enclosed \$4.95 for each necklace. Mail to:

The MX missile question puts Utah politicians between a rock and a hard place.

They have to weigh the wishes of their constituents with the nation's needs for defense, then take a stand.

Considering a new poll recently conducted by the Deseret News showing most Utahns and Nevadans don't want the missile system in their areas, many Utah politicians are hesitant to speak up.

Following are summaries of Utah politicians' viewpoints:

Sen. Jake Garn, R-Utah holds a key position in the Senate Appropriations Committee as far as the MX development goes.

Garn was an early supporter of the missile system. A campaigner for national defense, Garn believes the MX missile is critical to the nation's defense.

He did express reservations about the racetrack basing mode, however.

Sen. Orrin Hatch, R-Utah commenting on the recent decision to abandon the racetrack deployment method, said "In the hearing on the MX it was disclosed by Dr. William Perry, undersecretary of Defense for research and development, that the racetrack concept for deployment of the missile is in fact dead."

"The Air Force has now proposed a linear system. This will help the land problem, for now the entire MX system will only need about 35 valleys, as opposed to 50 in the racetrack."

Hatch has said that great growth will come out of the proposed MX area with or without the MX missile system.

Rep. Gunn McKay, D-Utah, recently had his proposed MX impact aid plan approved by the House Armed Services Subcommittee on Military Installations and Facilities.

"It (the impact aid plan) establishes the framework within which planning can begin within the state and local jurisdictions to minimize the possible adverse consequences of any possible MX deployment," he said.

"We overcame resistance to authorizing the impact aid when we assured the committee that our proposal does not commit Congress on the weapons system, and it does not refer to any specific geographic area."

McKay maintains it is time to make a decision on the location of the missile system.

Rep. Dan Marriott, R-Utah, said he favors the split deployment method.

Utah's Scott M. Matheson, though non-committed to MX deployment in his state has expressed deep concern for its necessity.

"In my role as protector of the interests of the people of the State of Utah, I must insist that the Department of Defense and the Air Force make the strongest case possible to demonstrate that deployment is necessary for the national security and that it is being done in a manner which is defensible strategically, scientifically, environmentally and socio-economically," he said.

Many politicians are finding their statements about MX outdated before they are printed in press releases.

MX: key to defense?

By 1989 the Air Force hopes to deploy what many have called "the biggest public works project in the history of the United States," the MX (missile experimental). Gov. Scott Matheson has referred to MX as "the most important public policy decision in Utah's history." The following is the first of a two-part series looking at what the MX is, what people think of it and how it will affect Utah. The following editors and reporters worked on this project: Ginie Oveson, Wendy Ogata, Kim Kaatman, Jerry Painter, Deana Lloyd, Phil Bussey and Joy Ross.

If the Defense Department builds a land based missile system, the Utah-Nevada Great Basin will definitely receive its share.

Whether it is the "linear track" mode, race track, vertical silos, horizontal silos, or some other means of deployment, Utah seems unavoidably destined to have nuclear missiles deployed in its desert.

Recent international events and prevailing views of Soviet Union nuclear missile power have prompted the Pentagon to push for a land-based missile build-up. The Carter administration favors the missile build-up in the Utah-Nevada Great Basin, with a remote chance of deployment in New Mexico or Texas. The Department of Defense has made it clear that choices other than the Great Basin area take a "distant second."

U.S. policy is that America is to accept a Soviet first strike, and then fire retaliatory weapons; U.S. leaders must be sure enough American missiles would survive a Soviet attack to do similar damage. If the Soviets destroy the United States, then the United States will destroy the Soviets. Survival of U.S. missiles is imperative if the Soviets are to be deterred from attacking.

Some Congressmen, proposing less expensive measures of deterring the Soviets, favor connecting U.S. missiles to a computer system to launch on warning, then firing missiles when it is detected that the Soviets have launched theirs. Defense Secretary Harold Brown, reflecting policy, says he doesn't want a computer to start World War III.

The Defense Department (DOD) fears the United States' big, new accurate missiles. Air Force Gen. Kelly Burke says by 1982 or 1983 the Pentagon will have the power to destroy all U.S. land-based missiles, Minuteman, with a fraction of a hydrogen bomb. To insure the survival of the American land-based missiles to deter the Soviets, the Pentagon is developing a "multiple program" system, the "missile experimental" (MX), key feature is its mobility. The DOD plans to build 200 missiles and hide them among 4,000 concrete shelters in the desert. The missiles will be between 23 shelters, like a shell game, to prevent the Soviets from knowing exactly where the missiles are. If the Soviets attacked, they theoretically need 4,600 bombs to destroy the shelters.

Besides the shelters, MX will require about 10,000 miles of new road, two Air Force bases, support facilities and about \$33 billion. The Air Force estimates cost would amount to about \$50 billion, taking into account.

MX will pack a powerful punch — carry warheads per missile. The current Minuteman carries only three. Each warhead is set to separate target in the Soviet Union. The MX is also about twice as accurate as Minuteman, officials say. Published estimates put the accuracy within 300 feet.

Russian missile silos better than any other weapon.

Current projections say MX will be 92 in diameter and 71 feet long. It will weigh 10,000 pounds and be about twice the size of Minuteman.

Two of MX's four stages are being developed by Utah corporations, Thiokol Corp. in Brigham City and Hercules, Inc. in Midvale.

As the missile travels to its potential target, the first three stages will fall back into the atmosphere. The fourth stage includes a computer which at the area, recognizes the surroundings and warheads to predetermined targets.

A full scale MX mock-up of what the Air Force hopes to deploy in the Great Basin area by 1989. The missile carries a 10 warhead payload and is about twice as accurate as the older Minuteman missiles.

Pros, cons of proposed missiles compared in simulated debate

Since the announcement of the MX system, several pros and cons have emerged.

Some viewpoints espouse a strong national defense, but oppose the MX plan. Others oppose all forms of missile build-up. Many, such as President Carter's administration, favor MX as it is planned for the Great Basin. The following is a list of many of the points cited by various viewpoints.

Involved in the opposition by Utah and Nevada residents of the MX system is an overall distrust of the Defense Department and Air Force. This distrust stems from incidents like the Hill Field range and Dugway, where areas once open to the public have now been completely cordoned off. Two things bothering many residents are the above ground nuclear testing and the poisoning of sheep in the southern Utah and Nevada areas. Both incidents still affect area residents.

— The MX would deter a Russian attack.

— It would be prudent to bolster American forces before the Soviet threat increases, defense officials say.

— The Defense Department says MX would head off a limited nuclear war with the Soviets.

— Besides being strong, America should appear strong. The MX would strengthen America's appearance.

— The MX sends a message to the Soviets: America is serious about defending its people.

— While two U.S. bombs could knock out one Soviet bomb in its shelter, it would take two Soviet bombs aimed at each of the shelters to knock out the MX warhead.

— Soviets have had a buildup of land-based missiles since the SALT agreement; therefore, the U.S. should have a similar buildup.

— The system is durable — MX

would survive a Soviet attack.

— It would benefit the area economically, providing more jobs. Developing the desert areas can help discover minerals and water deposits.

— The MX system is expandable. In event of a Soviet build-up the system could be increased.

— The MX system is accurate.

— The system would make Utah and Nevada one of the first targets in the event of an attack from the Soviets.

— The implementation of the system would accelerate the arms race.

— The vulnerability of the Minuteman missile force has been over-estimated.

— Soviets would have difficulty making an accurate attack on land-based missiles since their bombs would have to go over the polar caps. Polar gravity differences would affect the accuracy of the missiles. The present land-based system, Minuteman, isn't under as great a threat.

— The MX is designed with a SALT agreement in mind — it doesn't look like SALT II will be ratified.

— By threatening the Soviet missile system, we are giving them the incentive to build more missiles — we would provoke them to attack first in a crisis.

— Russians might be provoked to build a similar version of MX.

— Installation of the system would have a negative impact on the socio-economic system of the area. Instead of benefiting the state economy, it would have a negative impact on the economy.

— The system is likely to be outmoded by the time it is ready to be implemented.

— Utah and Nevada residents question placing the system only in Utah and Nevada rather than spreading it out over West Texas, New Mexico, Arizona and California.

MX necessary, ROTC say

By ROBERT BARNEY
Universe Staff Writer

Although BYU ROTC instructors agree with scrapping the MX racetrack system, they feel that the MX missile itself is necessary for national defense.

"According to Maj. Robert Houghton, "Our defense system stands on three legs: nuclear submarines, Air Force bombers (cruise missiles), and a land-based missile. Our current missiles, the Minutemen, are outdated and although they have been updated frequently, they are far behind the Soviets in design," he said.

Air Force Capt. Charles Bateman, BYU ROTC's "resident expert" on the MX, explained the need for the MX as

a land-based missile as opposed to submarine-based.

"There are several benefits to a land-based system," Bateman said, "including accuracy and cost. To be able to hit what you are shooting at, you must be able to determine where you are shooting from in relation to your target."

A submarine, traveling at 30 or 40 knots per hour, can make a mistake in calculating its position. An error of two or three degrees can be magnified immensely over the space of several thousand miles," he said.

Cost is another major factor pointing toward a land-based system.

"The cost of modifying our current

submarines to fit the MX would be more than a land-based system, as inefficient in terms of power and alert time," Bateman said. "Whereas a submarine can carry so many missiles and an alert only part of the time, a land-based missile system can have limited number of missiles as long as they are on alert all the time."

Not wanting to be accused of vociferous stockpiling, Bateman nevertheless expressed his more missile strength.

"We need a viable system so we have the ability to retaliate," Bateman said. "Determent is the name of the game."

The proposed MX missile site in the Great Basin area is equal to the combined area of five eastern seaboard states: Vermont, New Hampshire, Rhode Island, Massachusetts and Connecticut. To build the project

will require 10,000 miles of road, twice the amount of concrete used in the Hoover dam, 1.6 million tons of steel, 86 million tons of gravel and 5.6 million tons of sand.

Universe photo by John Taylor

Protesters listen to speakers at an anti-MX rally. Those against MX point to, among other things, the ecological drawbacks the project will bring. Those in favor of the plan say it will help deter a Soviet missile attack.

Y to excavate pyramid

The announcement of a joint pyramid excavation involving BYU and University of California at Berkeley came as the highlight of a series of lectures given Thursday and Friday by Dr. Leonard Lesko on ancient Egyptian religion.

BYU and Berkeley hope to excavate a pyramid at Selah, Egypt, in December 1980 or January 1981.

"Funding is now being sought to support this excavation," said Dr. C. Wilford Griggs, BYU associate professor of Ancient Scripture. "We anticipate taking a few students from each of the universities."

According to Griggs, the pyramid is estimated to be from the Third Dynasty in the Old Kingdom.

"We expect to find remains of the mortuary temples and of the causeway leading to the pyramid and other burial and funerary artifacts perhaps including funerary texts," Griggs said. "In the cemetery we expect to find sarcophagi and papyri texts. A sarcophagus is a casket, but we would never call it that."

Lesko's lectures on "Religion of the Pyramid Age" and "Some New Thoughts on Ancient Egyptian Religion" gave an introduction to this announcement. Lesko shared information concerning Egyptian burial customs, mythology and gods.

Indicated by the elaborate pyramids of ancient Egypt, the afterlife was important to the Egyptians. "That the afterlife was similar to this earthly life was widely accepted," Lesko said. Pyramids were filled with

provisions for the journey of the deceased into the next life. Within the pyramids and sarcophagi, guidebooks for the dead were included.

"A guidebook," Lesko said, "describes the paradise the deceased anticipates. It also describes the various demons he will encounter in his journey and whose names he is supposed to know."

Such texts are among those hoped to be found in the planned excavation. Mythology was important to the ancient Egyptians as well.

"Egyptian mythology," Lesko said, "included and satisfied almost everybody. Most political, economical, and social problems were worked out in terms of mythology. Problems and discrepancies were solved with new myths."

Although ancient Egypt was basically a polytheistic culture through most of its history, they were close to monotheism, Lesko said. "Early in the old time they had a belief in 'Re' as the supreme god," Lesko said. "They spoke of one god in their religious texts."

Kings were revered as divine in many cases, and the ordinary man also had some claim of divinity.

"Some or all who were alive were believed to be divine or some or all who died became divine," Lesko said. "Most gods were thought to have lived on earth at some time."

Lesko encouraged students to pursue Egyptology. "There is a lot of raw data and we need people to work on who are educated in this area."

Ancient rights aired

By LINDA L. PALMER
Universe Staff Writer

Women of ancient Egypt were highly respected citizens who did not suffer from sex discrimination, Barbara Lesko said Thursday in an illustrated lecture entitled "The Remarkable Women of Ancient Egypt."

"The ancient Egyptians did not denigrate women," Mrs. Lesko said, "but gave them many opportunities as respected and equal citizens enjoying equal rights under the law. Surely this was one of the greatest aspects of ancient Egypt."

Both royal and common women were given rights. Women of ancient Egypt enjoyed money, status and respect.

Queens of Egypt had wealth as well as prestige," Mrs. Lesko said. "This included large acreage, vast servants and men stewards and scribes."

Many royal women led armies to battle as shown in ancient artwork. Weapons of war and military medals like those held by military leaders have also been found in the tombs of royal women.

A letter written by a common woman in 1150 B.C. indicates common women also had wealth and respect. The author of the letter said she had no intention of leaving the inheritance she had received from her father and first husband to all of her eight children — they had not all been faithful in taking care of her.

"A woman could dispose of her own wealth as she chose," Mrs. Lesko said. "There was no discrimination according to sex. Brothers and sisters shared equally."

Because a woman was seen as equal under the law, she "could dispose of her property as she saw fit," Mrs. Lesko said. "Ancient Egyptian women

were completely independent legal personalities, equal under the law with a freeborn man. She could adopt children, sue, free slaves, and serve on juries — all on her own."

Women were also employed as merchants, professional mourners, cankers of tomb, scribes, doctors, factory workers and in the textile, wine, and perfume industries. In addition, "they could own, administer, and distribute property, thereby earning money through real estate," Mrs. Lesko added.

Since a woman was seen as equal to a freeborn man, her pay matched his.

"Men and women were paid equally for the same work regardless of age and sex," she said. "An attitude of respect for women's intelligence was shown in an ancient saying. 'An eloquent speech is more rare than the ancient green stone but may be found with maids at the grindstone.'"

Women were also considered equal before god.

"A woman could expect a happy afterlife without the intervention of her husband," Mrs. Lesko explained. "Some queens were even deified and worshipped during their lives. Royal lines were also traced through women. A man had to be married to a pure-blooded princess to be king."

Almost every woman had a religious title shown on her tomb. Egyptians were intensely religious people and from the earliest times had had women who were priestesses," she added.

Women also served in temple choirs, entertained the gods, and welcomed visiting officials to the temple. This equality, however, does not exist today. With the death of Cleopatra, this deteriorated. Today Egypt is an Islamic nation.

Provo studies budget proposals

By BILL HICKMAN
Universe Staff Writer

Raising taxes and cutting back on services are proposals being considered in Provo City's 1980-81 budget.

The tentative budget, submitted to the commission last week, is presently being reviewed by each department head in conjunction with commissioners.

The final budget must be drawn up by May 29 and reviewed at a public hearing June 17.

The proposed budget was compiled from minimum-level proposals submitted by each department. That level is 10 percent below present operating costs, said Leland Gamette, administrative assistant to the commission.

This year's budget is an increase over last year's, but how much is not yet known, said City Auditor Blaine Hall.

In order to meet that increase, Mayor James Ferguson has proposed an increase in the franchise tax which is assessed utility companies such as electric and gas, then passed on to consumers.

Fees charged by the city will also be increased, Hall explained, although they are a small portion of budget income. Services such as park and street maintenance will also be reduced to meet budget standards.

"We must have a balanced budget," Hall said. "We cannot have deficit spending."

Another proposal for the new budget is to adjust the mill levy, which simply means shifting the percentage of the mill levy from one area to another.

Blind student Tammy Johnson practices her technique in a BYU bowling class.

Despite blindness

By CHUCK GOLDING
Universe Staff Writer

Tammy Johnson is enrolled in a BYU beginning bowling class. Like her classmates, she is working on a smooth release, accuracy and picking up spares. Miss Johnson is like most everyone else in the class, except for one thing — she's blind.

"I bowled with other blind kids when I was really young," she said. "I did really good with them, they couldn't see either."

But since those childhood days Miss Johnson has not bowled much.

Miss Johnson's techniques are not much different than those of the rest of the class. "After I get the ball I find my position on the alley," she explained.

After locating the ball return machine, Johnson takes a couple of short steps and aims squarely down the center of the lane.

After four more slow steps, Miss Johnson releases the ball. On an errant throw she disinterestedly stomps back for her second attempt. But she walks back casually after a direct throw down the center of the lane, anxious to be informed of the results.

"When I throw a gutter ball, I know it immediately," she explained. "I can feel my arm twist or my body move wrong."

Even though she is a beginning bowler, her gutter balls don't come frequently.

"She added the class a week late," said Sue Larson, Tammy's instructor. "At this point she is bowling about the class average."

On Miss Johnson's successful tosses down the alley, classmate Tammy Olsen will usually be the one to tell her what she has scored. On one such occasion Miss Johnson's ball curved right into the pocket, but lacking a little speed left one pin standing.

Study may save Barbizon plant

By BILL HICKMAN
Universe Staff Writer

A comprehensive study of the Provo Barbizon manufacturing plant, including the possibility of community or worker ownership, will be conducted by a nine-member task force that will include four BYU personnel in an effort to minimize the negative impact of its projected June 30 closure.

The Provo City Commission and Western Interstate Commission of Higher Education, an organization of 13 western states that funds senior and graduate students in civic economic development projects, agreed to provide \$1,150 to establish an internship to study solutions to the Barbizon closure.

Gordon Rands, a graduate student in organizational behavior received a 12-week internship to develop a program in which the employees both own and manage the plant.

The task force, which will conduct a four phase study, is composed of Warner Woodworth, a BYU organizational behavior professor, three BYU graduate students in organizational behavior, Rands; Cindy Lindsay, from Los Alamos, New Mexico; and Jay Stoddard from Provo; three officers from the International Ladies Garment Worker's Union; a representative from the Laborers Association; and Garth Limburg, a redevelopment specialist with Provo City.

The task force is in the process of educating itself on the various options available to the plant.

"Traditionally the plant just closes and the workers find other jobs," Rands said. "But we plan to study the feasibility of worker or community ownership and management."

Often times factories are closed not because the organization is losing money, but because it's not making enough for the corporation," he added.

Limburg said, "In some cases employee-owned companies can live on a lesser profit margin than nationally-owned companies."

Provo Mayor James Ferguson said he was excited about the project and hopes a strategy can be developed through the Barbizon case to keep businesses and industries in Provo that might experience similar problems.

The employees of the Barbizon plant are concerned about the closure, said Rands. Some of them have found other jobs, but the majority will be without. "An impact study on the what will happen to the employees will also be part of the project," he said.

Other phases of the study will include setting up a management guideline process, such as how the board of directors should be chosen and how stock should be sold, said Limburg.

"Employee ownership is not a common thing," Rands said. "But it has worked well in many cases back East." "It is to early to tell whether or not it will work here."

Provo City is funding half of Rands' internship while WICHE is funding the rest. Provo City hopes through working with Barbizon to develop a strategy to keep other businesses and industries in Provo that might experience similar problems.

NOTICE OF SALE

Notice is hereby given that the undersigned will sell to the highest bidder on May 18, 1980 at the hour of 1:30 p.m. at the Traffic Office located at 700 East 1230 North (East of Cotton Blvd. Tower), Provo, Utah, the personal property hereinafter described.

Said personal property has been held by the Brigham Young University Security Police Department for more than 90 days, and all reasonable efforts have been made by the Brigham Young University Security Police Department to discover the owners thereof. No claims have been made to any part of said property.

Cuban MiG pilots error in sinking Bahamian boat

NASSAU, Bahamas (AP) — The Cuban government said Monday that its MiG pilots who sank a Bahamian patrol boat, killing four crewmen, mistook the vessel for a "pirate ship." Bahamian Prime Minister Lyndon O. Pindling termed the statement a "coverup" but said he would accept it as an apology.

A high-level Cuban delegation, led by Fidel Castro's brother Raul, the armed forces minister, arrived in Nassau Monday for discussions about the incident.

The delegation, which also included Cuban Foreign Affairs Vice Minister Cagelino Torres and Cuban U.N. Ambassador Raul Rouri, were scheduled to meet with officials of the Bahamas Ministry of External Affairs.

A spokesman for Bahamas' National Security Council said the government would protest the attack "in the strongest possible terms" and suggested Nassau might take the issue to the United Nations.

Great Britain, meanwhile, joined in denouncing Cuba for what it called an irresponsible action. The Foreign Office also announced that a Royal Navy frigate, the Eskimo, is in the area.

Deportation rally held at Weber

By JERRY PAINTER
Universe Asst. Editor

"I hope it rains tomorrow," said Howard Noel, a Weber State media relations spokesman, prior to the Iranian deportation rally at Weber State's soccer field.

"It's not an event we'd like to see happen," Noel said. Planned by Edward F. Devlin II, a freshman from Layton, the rally started Friday at noon.

Weber State Iranian students said they were going to stay away.

"There are anti-American Iranian students on campus openly supporting the hostage situation," Devlin said, raising his voice before some 200 students gathered on the swampy-wet soccer field.

"They don't have a right to down grade the United States," he said. A TV reporter and cameraman pushed through the crowd until they stood just in front of Devlin.

"Are you saying Iranians don't have a right to protest?" A reporter asked.

"Yeah, they should," Devlin began, but stumbled with his words as the TV camera zoomed in for a close-up.

A tall student wearing a cowboy hat, several feet from the action, helped the struggling Devlin, shouting "We're spending our money to train them to attack America."

"That's right. We shouldn't have to pay our tax money to educate people holding Americans hostage," Devlin said triumphantly. A few subdued claps and "Yeah, you tell 'em" echoed through the crowd.

Devlin was asked if this was to be a "Jim Jones Kool-aid rally", as his promotion pamphlets called it. Devlin said that was "just a joke."

"This is totally unorganized," a Weber State professor said as he watched from the out-skirts of the crowd. One student looking on from the perimeter turned to his friend saying, "Let me get you in a headlock so they can report 'violence at the campus rally.'"

By now microphones crowded around Devlin in the center of the crowd.

"What bothers me is the attitude of the Iranian students here on campus," Devlin said. "I'm gonna go around to my neighborhood and get people to sign my petition to get them all deported."

"Do you think it is wise to deport every Iranian? What about those who've applied for citizenship?" A reporter asked.

"Well, ah, I think . . ." Devlin stared at the tape recorder a few inches from his jaw.

"Let's have a blanket deportation of all Iranians," yelled someone from the crowd.

"No you can't do that," said the student wearing the cowboy hat. "There are some who keep their mouths shut."

About 50 yards from the scene, two Weber State security police chatted about what they were seeing: "I think I'd rather have stayed home and watch my petunias grow," a officer said. The other officer smiled and said it would "probably be more exciting than this."

Utah Constitution 'poorly written'

By DAVE KUHN
Universe Staff Writer

Utah's Constitution is "poorly written" and full of "loopholes," said a member of the Utah Constitutional Revision Commission during a meeting held Friday in the Orem City Center.

The meeting was held to discuss with local government officials four proposed revisions and amendments to Utah's Constitution that will appear on the November ballot.

The amendments deal with compensation for legislators, improvement of the prisoner work release program, and the present executive and tax articles.

The Commission has been meeting since the late 1960s to discuss and revise various parts of Utah's Constitution. Ray Hixson, a citizen member of the board and chairman of Bonneville Associates, said, "The Utah Constitution is poorly written and has a lot of loopholes. These revisions we've haggled out would help close some of them."

One of two proposed amendments will increase the compensation of legislators from \$25 to \$40 per day during a session.

"Some people think we're voting ourselves a pay raise. Actually, we're only trying to make sure that everyone can serve in the Legislature, not only the rich people," said Rep. G. LaMont Richards, R-SLC.

Committee member Ed Mayne, president of Utah AFL-CIO, said, "A man working in an oil refinery would have to run for the legislature but decided not to when he found out he would lose almost \$800 a month in pay. My fear is that without this revision we're only going to have self-sufficient people in the Legislature and forget about the common man."

Sen. Karl Snow, R-Provo and professor of Public Management at BYU, said he is in favor of the proposed tax revision.

"The revision will allow a tax reduction on homes, similar to the Homestead section we now have, but it will give the Legislature more discretion than in the past," Snow said. "They'll be able to debate more on property taxes."

The revision will also allow property owned by a city to be taxed if outside of the city's geographic boundaries. Snow said. "An example is the Utah Power and Light power plant in Emery County. Provo is currently in the process of buying part of it. Under current law, that part would be non-taxable, which means Emery County would lose important revenue. This article would provide for the reimbursement of Emery County by Provo," Snow said.

The Executive Article revision would allow the Legislature to call a special veto session. At present, only the Governor may call special sessions.

"As a result, many bills we pass are vetoed by the Governor after we go home," Sen. Darrel Renstrom, D-Weber County, said. "Gov. Rampton thought it was good strategy to do that because there was no way for the legislature to override his veto. This amendment would give us a constitutional check we don't have now," he said.

The final amendment will allow firms to contract prison labor outside the prison grounds. The present practice allows prisoners to work only on projects directly controlled by the state. According to the Commission, "The merits of work rehabilitation programs have been well established as an effective part of modern correction programs."

The amendment would also allow women prisoners to be employed in underground mines, the Commission said.

"All this revision does is update the Constitution to conform with modern practices," said Commission Director Martha Dwyer.

Civil engineering names chairman

By DARRELL MARTIN
Universe Staff Writer

The civil engineering department has selected a new chairman. Dr. Henry (Hank) N. Christiansen will become department chairman for the next three years.

"I am looking forward to the challenge," Christiansen said. "In the next three years, four senior members of our staff will be retiring. It will be difficult to find adequate replacements with their breadth of experience."

When asked how he felt about his new appointment, Christiansen said, "I never thought of it as an appointment. I've been in the department for 15 years and this happens to be one of my responsibilities now."

Christiansen explained that he thought he had been called to be chairman at a special time.

"I feel we have an excellent program, but not enough research has been done in the past. One of my challenges will be developing a good research program," he said.

In recent years, Christiansen's professional work in computer graphics has brought him international exposure. Sponsored by the Australian Association for Computer Aided Design Ltd., Christiansen served as the keynote speaker at the First Australian Conference on Computer Graphics and Spatial Analysis this past summer. In 1978 he toured Europe and Israel, giving 32 lectures in 14 nations.

Christiansen's latest travels have included giving lectures and workshops on the use of the "Movie.BYU" software system. The software system consists of computer programs which are designed to graphically display characters on a screen. These graphics have been put into motion pictures.

Christiansen said, "A funny thing happens when people who are not familiar with BYU ask for the movie. They say, 'Can we get the movie by you?'"

The computer graphics software system has been developed as a result of Christiansen's sponsored research at the University of Utah and BYU. It has been distributed to over 300 organizations in 20 nations on 5 continents. He has participated in its installation at the University of Utah, BYU, Ford Motor Company, and Exxon Research and Engineering Company to name a few.

From State Prison

Inmates to clean highways

The Utah Department of Transportation has signed an agreement with the Utah Division of Corrections to use minimum security prisoners from the State Prison to maintain highways in Salt Lake and Utah Counties, a UDOT spokesman said Friday.

"The initial cost of the program will be \$28,000," said C.V. Anderson, assistant director of transportation. He expects that amount to keep the program going for five months.

"The program is just an experiment for right now, but if it works out, we will continue it," Anderson said. "Right now we only have ten inmates working, but we hope to use as many as we can. It not only helps us to cut costs, but it gives the prisoners something to do. They tend to get bored at the prison."

Anderson said the inmates are being used mainly to clean up the highways by picking up trash along the roads.

He said it was very unlike prisoners would escape because there will be two guards, and the prisoners being used are from minimum security facility.

"The program will probably be abandoned if anyone escapes," Anderson said. "Right now it looks good; a lot of work is being done, and we haven't had any problems with the prisoners."

Anderson claims that by using prisoners, more work is accomplished for less money.

"We can maintain more roads by using the inmates than we could if only using our staff," Anderson said.
